

FLIPPER B

**FLIPPER-BI** is the new shelf support suitable for both wood and metal shelves. The shelf has to be pushed downwards onto the side dowels, which can be placed or screwed into any position required. The side dowels slot into the socket of the shelf supports and a click locks the shelf in position. To provide a structural fastening to the furniture screwed side dowels are required, so that the shelf flushes with the sides, due to the angled shape of the shelf support sockets. New stylish and highly captivating squared shape.

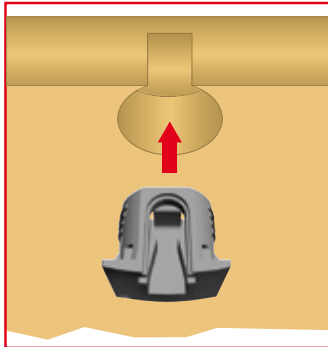

Available for:  
 - min. 18mm thick wood shelves  
 - min. 15,5mm thick metal shelves

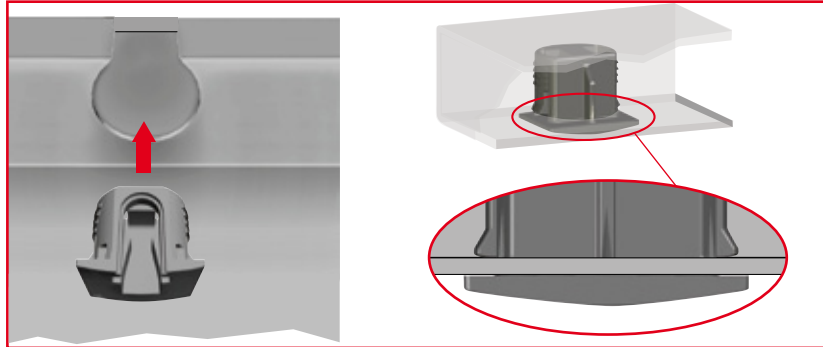

## ASSEMBLING
