KERALA

KERALA is the new shelf support boasting a captivating design, especially conceived by Italiana Ferramenta Srl for kitchen furniture. KERALA is made of two elements in technoplastic: an actual support to be slotted into the panel and a special dowel to be inserted into the side. The installation is carried out very easily because the dowel locks into the support simply by pressing the shelf downwards. The particular shape of the components guarantees the locking of the shelf and, therefore, the transportation of the furniture with the shelves already assembled. As for the installation, also the disinstallation does not require the use of any tool, as it is simply carried out by sliding the clip backwards. For shelf minimum 16mm thick.

Engineering plastic

In accordance with the European regulations UNI EN 14749/

16 mm min.

UNI EN 14749/05

INSTALLATION

ASSEMBLING WITH SMOOTH PIN
